

GRADUATE CAPABILITIES

PURPOSE

Graduate capabilities, integral to the production of highly sought after and distinctive professionals, provide the framework to the knowledge and skills sets attained by each graduate. The same graduate capabilities provide a reference point for curriculum design, course development, and alignment of course learning outcomes with assessment tasks.

The policy ensures mapping and appropriate achievement of graduate capabilities within the Australian Qualifications Framework in addition to requirements set out by Professional Accrediting Council on Chiropractic Education Australasia (CCEA) and regulatory bodies Chiropractic Board of Australia (CBA).

SCOPE

This policy applies to all students and academics at the ACC.

POLICY STATEMENT

The ACC is committed to the development of chiropractic leaders who have the embedded desire to serve, the fortitude to maintain traditional Chiropractic tenets and the confidence and knowledge to utilise their cutting edge practice skills in an ethical manner in both clinical and business practices.

Staged and level appropriate development of graduate capabilities will be continually monitored and reviewed to ensure the production of graduates who are capable of transitioning efficiently and effectively into professional practice, thus increasing public and professional confidence in the quality of graduate produced by the ACC.

GRADUATE CAPABILITIES

Graduate Capability 1

Proficient Clinical Skills
